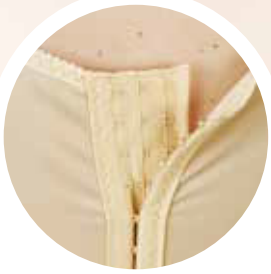
H612 Comfort Bra

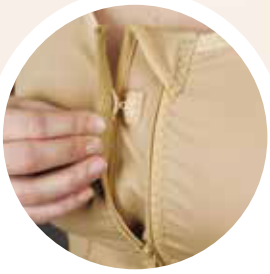
The Eto Comfort bra is constructed from extremely comfortable and supportive material that is designed to provide adjustable, gentle compression and support to the chest and breast area.

It is designed for those patients with chest and breast lymphoedema and those recovering from breast cancer surgery.

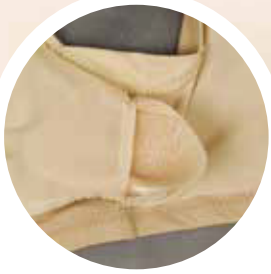
Klima Comfort under arm gussets add comfort and help wick away moisture



Adjustable hooks and eyes at the back of the bra allow compression levels to be modified



A combination of two hooks and eyes with high quality zip make the bra easy to put on and take off



Built in pocket for prosthesis
